OVERHAUL**

USA manufactured, these quality tools are ergonomically designed for comfortable and safe use.

The Pry line can be used on automotive interior and exterior mouldings and panels. The Pry and Scraper tool range is sturdy and yet will greatly reduce the chance of scratching most plastics or paint finishes.

The Pry and Scraper tool lines are also ideal for other automotive applications such as stereo/alarm installation, glass and body shop applications.

Several dedicated kits are available, taken from the range of over 30 standard tools.

Bespoke kits, already popular with numerous industrial customers, can include modified and custom tools, alternate materials/colours and private label branding.
